

## **ENERGY CONSERVATION COMMITTEE**

<b>Members:</b>	9
<b>Appointed by:</b>	Selectmen
<b>Length of Term:</b>	3 years, staggered
<b>Appointments Made:</b>	September 30
<b>Meeting Time:</b>	As Posted

**Description:** The Energy Conservation Committee is charged with advising town officials as to ways to enhance energy conservation throughout the Town's existing physical plant, including but not limited to all municipal and school buildings, street lights, vehicles and equipment.

The Committee shall consider the feasibility of developing energy conservation standards and suggestions and make any recommendations for implementation that they see have a reasonable payback. The Committee shall make recommendations for implementing organizational changes to provide ongoing monitoring and management of energy costs and to complement any work currently being undertaken by the Electric Utility Ad Hoc Committee and the Permanent Building Committee.

The Committee will recommend an energy policy that ensures sustained commitment to energy conservation.

**Criteria for Membership:** Nine members with interest/expertise in ways to enhance energy conservation. Liaisons may include the DPW Director, the Public Facilities Director, Selectmen and School Committee.

**Ref:** Adopted by the Board of Selectmen on November 21, 2005.  
Revised charge on January 18, 2006 (recommend energy policy)  
Board of Selectmen voted to designate as Special Municipal Employees on 1/18/06.  
Selectmen approved revised charge on September 12, 2011 (membership changed to 9 and changes to Criteria for Membership)
