

SUSTAINABLE ACHIEVEMENTS

MAKING STRIDES IN A GREENER DIRECTION

CONSERVE WATER. NOT USING IT? TURN IT OFF!

Reducing water use saves money, energy, and precious natural resources. Together we can conserve. The Town has a voluntary water restriction seasonally. Be water wise.

REDUCE YOUR WASTE.

MAKE IT A HABIT TO RECYCLE AND START COMPOSTING TODAY

900 households have signed up for weekly curbside compost pickup. 600+ of your neighbors compost in their backyard.

100 % RENEWABLE ENERGY COMMUNITY CHOICE AGGREGATION

Lexington offers its residents 3 options for their energy portfolio. Residents can opt up to have 100% renewable energy, remain in the New England green mix, or opt out for the basic choice.

ELECTRIC VEHICLES

POWERING CHANGE ONE CAR AT A TIME

With two new electric vehicles in the fleet and plans for more on the way, we care about lowering our transportation emissions.

SOLAR ROOFTOP AND GROUND ARRAYS

The town has 7 buildings with rooftop solar arrays and one large ground array at Hartwell Ave. There are parking lot canopies at a few of the schools too.

Trees

Lexington is a Tree City USA, and proudly participates in Arbor Day Annually.

We aim to plant 140 Trees every year, and are seeking ways to expand our tree canopy.
