Article 12: Amend Zoning Bylaw - Financial Services

Over the past several years, traditional banking practices have shifted towards Automatic Teller Machines (ATMs) and away from in-person financial transactions with tellers.

Article 12, Financial Services has been prepared in response to the shift from traditional banking practices towards Automatic Teller Machines (ATMs), by combining the current use categories "Banks and credit unions" and "Automatic teller machines" into a single "Banking services" category, and amending the Table of Uses accordingly.

The Select Board unanimously supports the passage of this Article.
