Article 16(j)

East Lexington Fire Station Feasibility Study

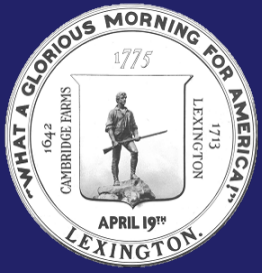

East Lexington Fire Station

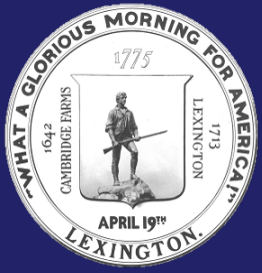

What is the need?

- In 2020 Public Facilities had a conditions assessment done on all town and school buildings including the East Lexington Fire Station.
- The facility was built in 1951 and the only major work performed on the building was to widen the front doors
- The station was rated as an “F” building based on the significant needs of the building.

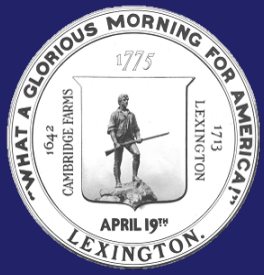

Conditions

Conditions

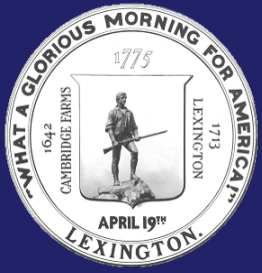

Conditions

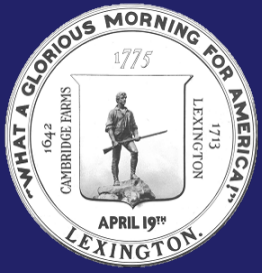

Annual Town Meeting 2023

What is the request?

A feasibility study would be performed to determine a number of outcomes including:

1. What size should the facility be to accommodate modern fire fighting equipment
2. Where should the fire station be located in order to provide fire fighting response coverage for East Lexington
3. Identify parcels of land that are appropriately sized to locate the new facility

Appropriation

Appropriate \$50,000 to perform a Feasibility Study on the East Lexington Fire Station
